

Education Programs of HHRDO

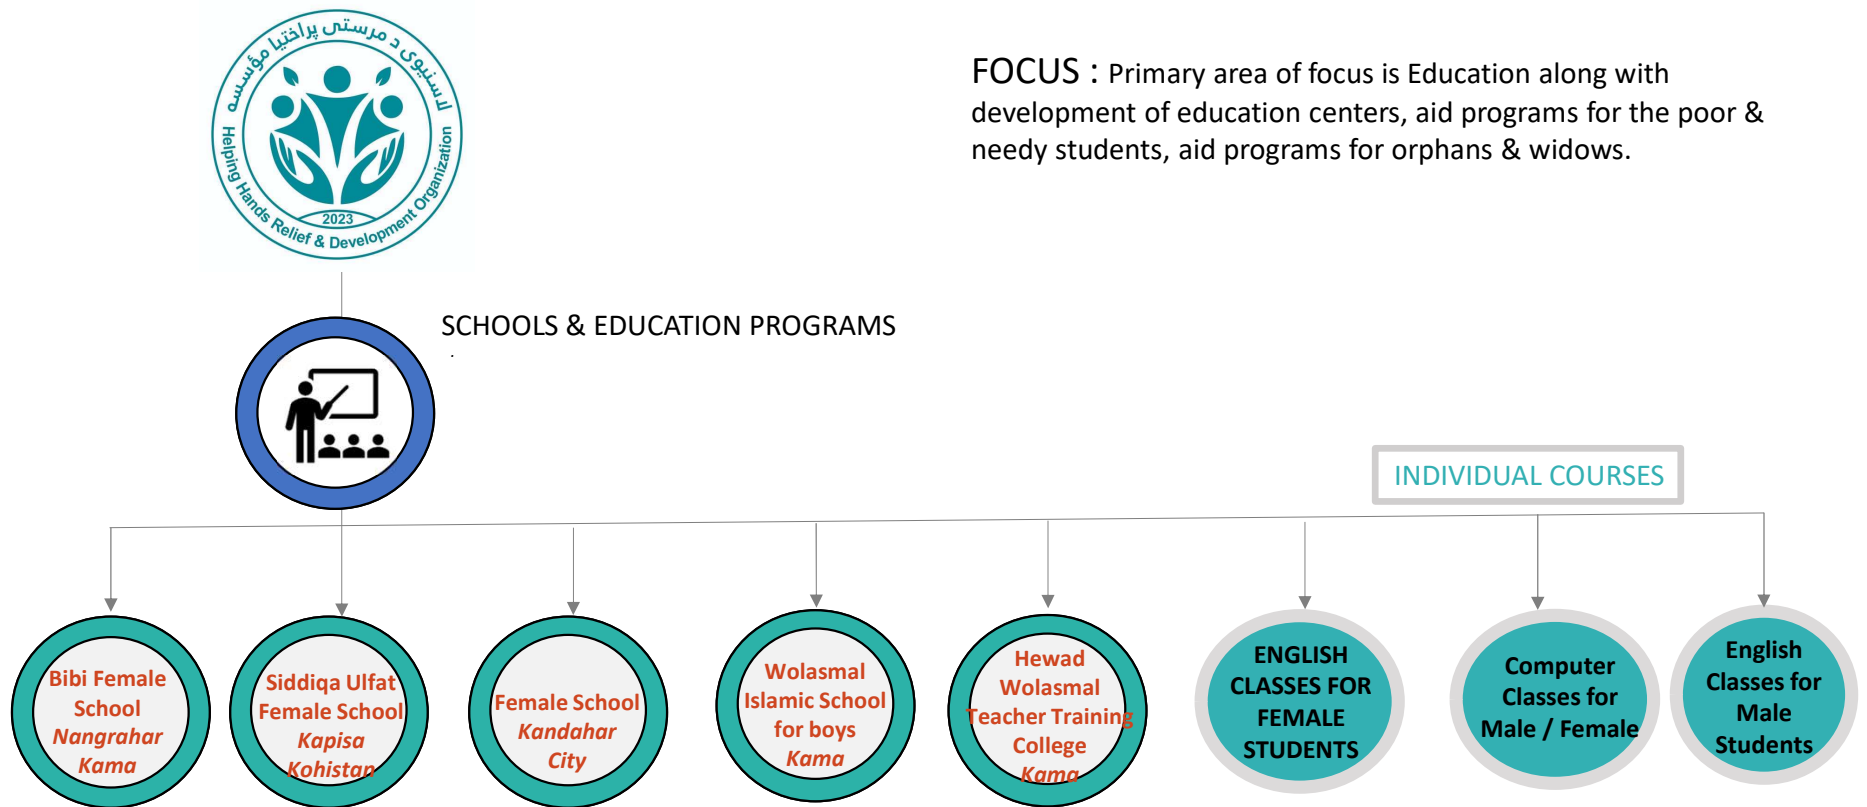

AFGHANISTAN

FEBRUARY 2023

About HHRDO

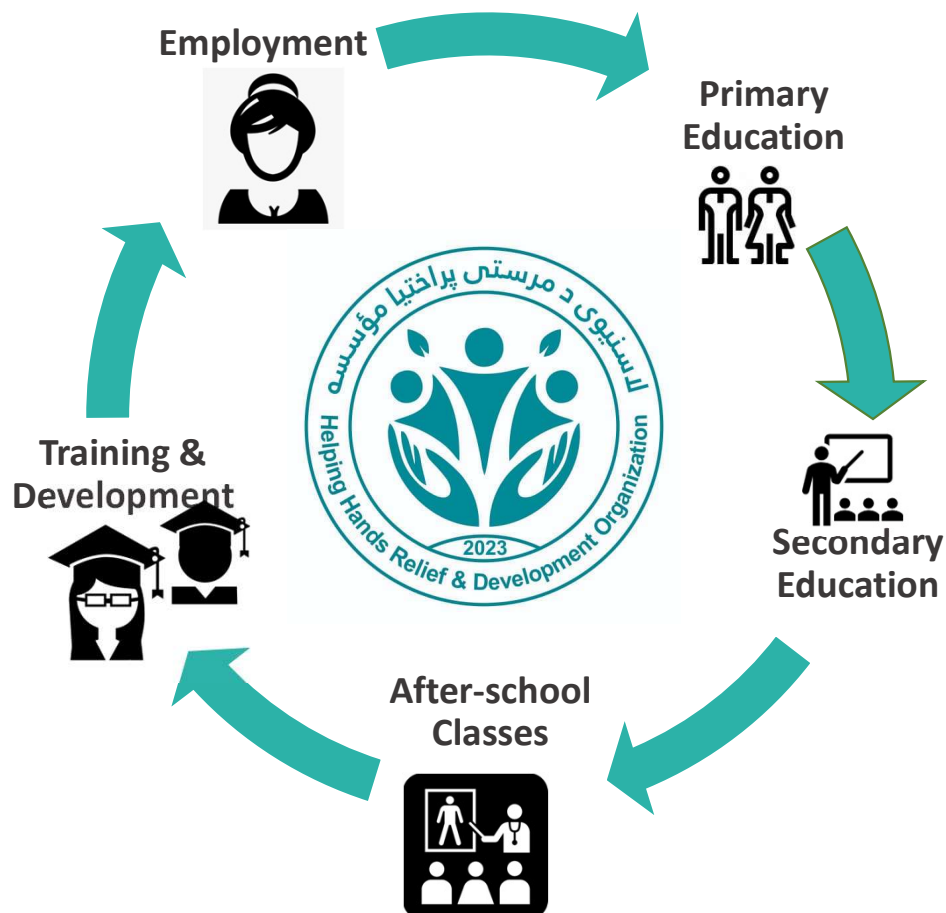

- Helping Hands Relief & Development Organization (HHRDO) is a registered non-profit organization operating in Afghanistan
- HHRDO was established in 2018, it started as a family funded initiative by members of Wolasmal family residing in Norway and gradually it attracted a network of friends. Witnessing an exponential growth and demand for our services, we had to organize our activities into a formal organization. HHRDO was registered with Afghan authorities as NGO in Jan 2023.
- Our mission is to provide and facilitate education opportunities for the deprived children in rural communities of Afghanistan
- Illiteracy and ignorance is known to be the main cause of war, conflicts and poverty in Afghanistan and our goal is to fight illiteracy and facilitate a better future for children
- Our education model is a mixture of modern education with religious studies due to;
 1. Minimize/ eliminate the resistance from parents within conservative religious communities
 2. Avoid any conflict/issues with religious groups, i.e. Taliban etc.
- Our policy of neutrality has paid off, as with the transition of power in Afghanistan in 2021, our schools and activities have remained largely untouched

GENERAL OVERVIEW

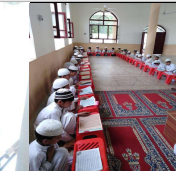

FOCUS : Primary area of focus is Education along with development of education centers, aid programs for the poor & needy students, aid programs for orphans & widows.

Developing a knowledge-based echo system

	TOTAL				5,550	66,600

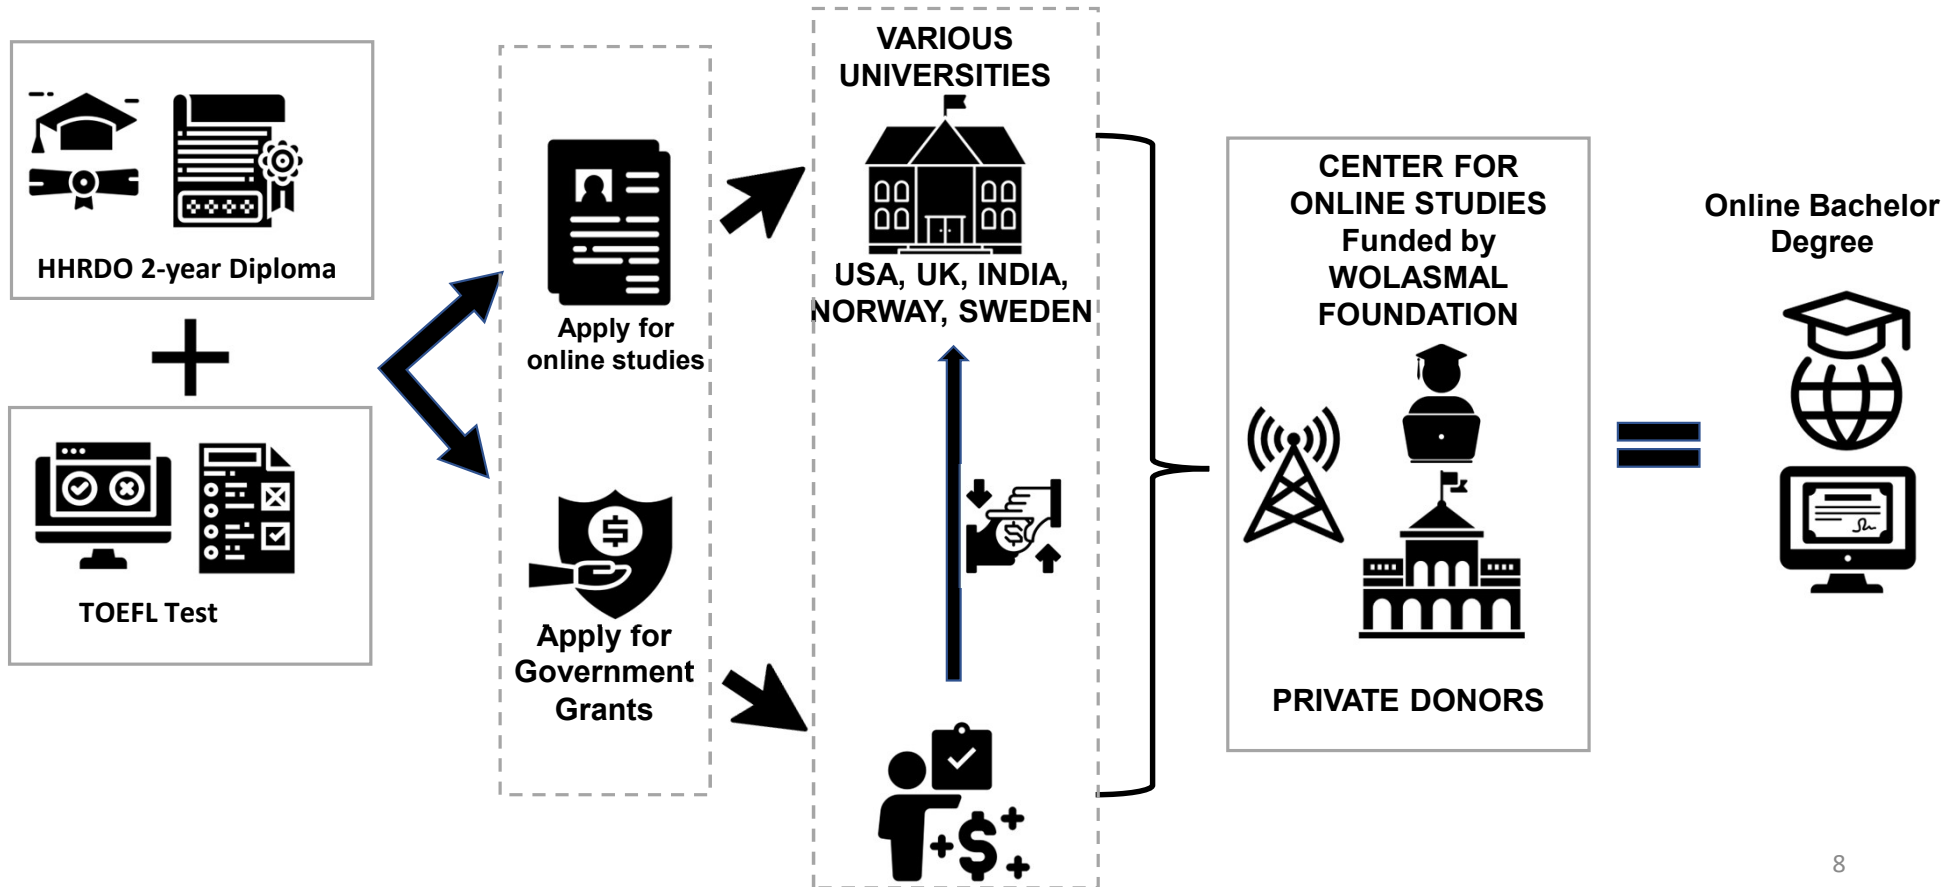

Notes:

- Salaries:** Total number of staff that are hired, which includes, administrators, accountant, teachers, cleaners, doorman/ guard,
- Transportation:** Due to restriction on movements of ladies, transportation is arranged for female teachers to-and-from school,
- School supplies:** HHDRO provides, books, notebooks, pencils and other utensils to students, the monthly average is about 135 dollars,
- Maintenance:** All HHDRO facilities are equipped with indoor plumbing, clean water and solar power that require regular maintenance, including civil works such as repairs, painting and consumables such soap, cleaning chemicals
- Grants:** In total 73 families (widows) are given an average grant of 25\$/month. This initiative is mainly directed at families of students who risk to become child-labor instead of attending schools

Initiative for Online Studies

- HHRDO is seeking to facilitate Online Bachelor studies for Students in Afghanistan
- The program to be launched in one area of Afghanistan as a test-model and once established it can be expanded to other major cities in Afghanistan.
- HHRDO recently started a 2-year degree program within the field of Computer Science,
- Students obtain a diploma qualifying them as computer science instructors but not a bachelor degree
- We plan to extend this program to bachelor degree through online studies
- The success of this initiative rests on **achieving agreements/MoU** with various universities in Europe, particularly Norway, that offer online studies;
 - Students to be enrolled by fulfilling the respective universities' requirements (tests, qualifications)
 - A pre-requisite by HHRDO allowing students to enter in this program is:
 - Completion of 12-year high school degree
 - Completion of 2-year HHRDO diploma
 - Obtaining a minimum score of 75 in TOEFL test
- Upon successful enrollment, HHRDO in collaboration with the respective university will seek government grants to cover the fees for online studies
- Eventual grants/fees to be paid directly by the state-donor to the universities,

ROADMAP TO ONLINE DEGREE

Benefits of Online Degree

- Under the current circumstances online studies is the best and most efficient form of aid that European countries and US could provide to Afghan people
- For a normal scholarship the host country will have to pay:
 - Tuition Fees
 - Accommodation
 - Living Allowance
 - Travel Allowance
 - Health Insurance
 - Visa ++
- Almost 50% of students don't return back to their home countries, specially to war-torn countries like Afghanistan. With online studies, there is 100% retention.
- With Scholarship programs Women from conservative societies especially rural areas, are not able to participate, but with online studies they will benefit directly
- Zero bureaucracy, no government involvement, no corruption or nepotism. All students benefit directly. Direct Aid to people
- The only costs are:
 1. Online Tuition Fees (to be covered by the host country/university)
 2. Cost of Facility/ Center for online studies (covered by WEF)
